

Try dive in Tenerife.

Because we know that the first experiences are the most important one during your diver life, CABO canarias put all its knowledge and pedagogy at your service to make from your try dive in Tenerife some unforgettable memories.

Our program includes a session in swimming pool to get use to your equipment, to find out how easy it is to breathe under water and discover the pleasures of weightlessness.

Once the basics are mastered, we will take you along straight away to explore the underwater world starting from the shore. A chance to be located so close to a bay rich with underwater life, which we can explore without the need of any boat.

A Photo CD from your dive is available at the end of the program.

If you have done several try dives already, it is may be time to join a scuba diving course.
